AIOHTTP is vulnerable to HTTP Request/Response Smuggling through incorrect parsing of chunked trailer sections

- Advisory: GHSA-9548-qrrj-x5pj
- CVE: CVE-2025-53643
- Severity: low
- Published: 2025-07-14
- Updated: 2025-07-15

Affected

- `aiohttp` (pip): < 3.12.14, fixed in 3.12.14

Description

Summary

The Python parser is vulnerable to a request smuggling vulnerability due to not parsing trailer sections of an HTTP request.

Impact

If a pure Python version of aiohttp is installed (i.e. without the usual C extensions) or AIOHTTP_NO_EXTENSIONS is enabled, then an attacker may be able to execute a request smuggling attack to bypass certain firewalls or proxy protections.

Patch: <https://github.com/aio-libs/aiohttp/commit/e8d774f635dc6d1cd3174d0e38891da5de0e2b6a>
