Eventlet affected by HTTP request smuggling in unparsed trailers

- Advisory: GHSA-hw6f-rjfj-j7j7
- CVE: CVE-2025-58068
- Severity: medium
- Published: 2025-08-29
- Updated: 2025-11-04

Affected

- `eventlet` (pip): < 0.40.3, fixed in 0.40.3

Description

Impact

The Eventlet WSGI parser is vulnerable to HTTP Request Smuggling due to improper handling of HTTP trailer sections.

This vulnerability could enable attackers to:

- Bypass front-end security controls

- Launch targeted attacks against active site users
- Poison web caches

Patches

Problem has been patched in eventlet 0.40.3.

The patch just drops trailers. If a backend behind eventlet.wsgi proxy requires trailers, then this patch BREAKS your setup.

Workarounds

Do not use eventlet.wsgi facing untrusted clients.
